

Presenter Assistance/Speaker Support

There are a number of ways in which GavCom Media Productions can provide presenter assistance/speaker support.

Teleprompters

Teleprompters are the most common presenter assistance/speaker support AV tool currently available. Many large events (including the Golden Globes, Academy Awards to name two) use teleprompters to assist the speaker/presenter.

The teleprompter is an excellent addition to any speech. It is a great backup to all speeches and assists the presenter/speaker with the flow of their speech.

Slide Remote

The slide remote gives the presenter/speaker the ability to forward their own PowerPoint slides. This allows the presenter/speaker to go at their own pace and control their own presentation.

Preview Monitor

A preview monitor is an excellent addition to any presentation. A preview monitor gives your presenter the opportunity to view the slide that the audience is viewing (or photo, etc.). This ensures that the presenter is comfortable with what is being shown to the audience and also ensures that they do not look over their shoulder to view the slide (something that happens quite often and is not only a distraction to the presenter, but also the audience).

Making Your Presenter/Speaker Comfortable

Some presenters/speakers are extremely experienced and comfortable with all elements of the event, whereas others are a bit less experienced and may need additional support or audio visual equipment. At GavCom Media Productions, we assist your presenters/speakers to ensure that they are comfortable presenting and can provide rehearsals if necessary. We can also work with your presenters with any last minute additions or changes to their presentation with ease.

We also take the time to ensure that your presenter/speaker is comfortable with the audio visual equipment including microphones, podiums, teleprompters, slide remotes, and preview monitors.

Contact GavCom Media Productions today to learn how we can make your next event outstanding! We can be reached at 416.746.5050 or info@gcmp.ca.
